**CUSTOMISE
IT YOUR WAY**

3D & FLAT EMBROIDERY

Flat Embroidery is no doubt one of the most popular ways to customise headwear.

With a high thread count creating a smooth detailed finish, colour combinations are possible allowing most logos and designs to easily translate to an array of surfaces.

3D Embroidery is a technique where foam is placed under the top stitch to raise the stitched surface, giving a three-dimensional look to your embroidered designs.

Making your artwork pop and giving you a premium finish on your cap. It can be combined with flat embroidery or PU print giving you a finished product with a difference.

We use german ZSK embroidery machines that give a superior finish! The final product has a smoother and more precise finish. With these new machines we can now do 10 000 embroideries a day!

FLOCKING

PANEL DETAIL

PU PRINT

customisation

••

Flocking has a velvet like texture due to thousands of tiny fibers used to make up the material. It is a great way to customise your headwear and also has some fantastic advantages over embroidery.

Flocking gives you a premium finish, designs can be made larger than embroidery and it can be placed almost anywhere!!

PU Print is ideal for highly detailed artwork with small text and many colours.

It gives you a smooth finish, it's cost effective and durable. Designs can be made larger than embroidery and can be placed almost anywhere on headwear!!

METALIC PRINTS

GLITTER PRINT

Metalic & Glitter Prints are applied in a similar way to PU Print this type of branding gives your designs a little sparkle and shine.

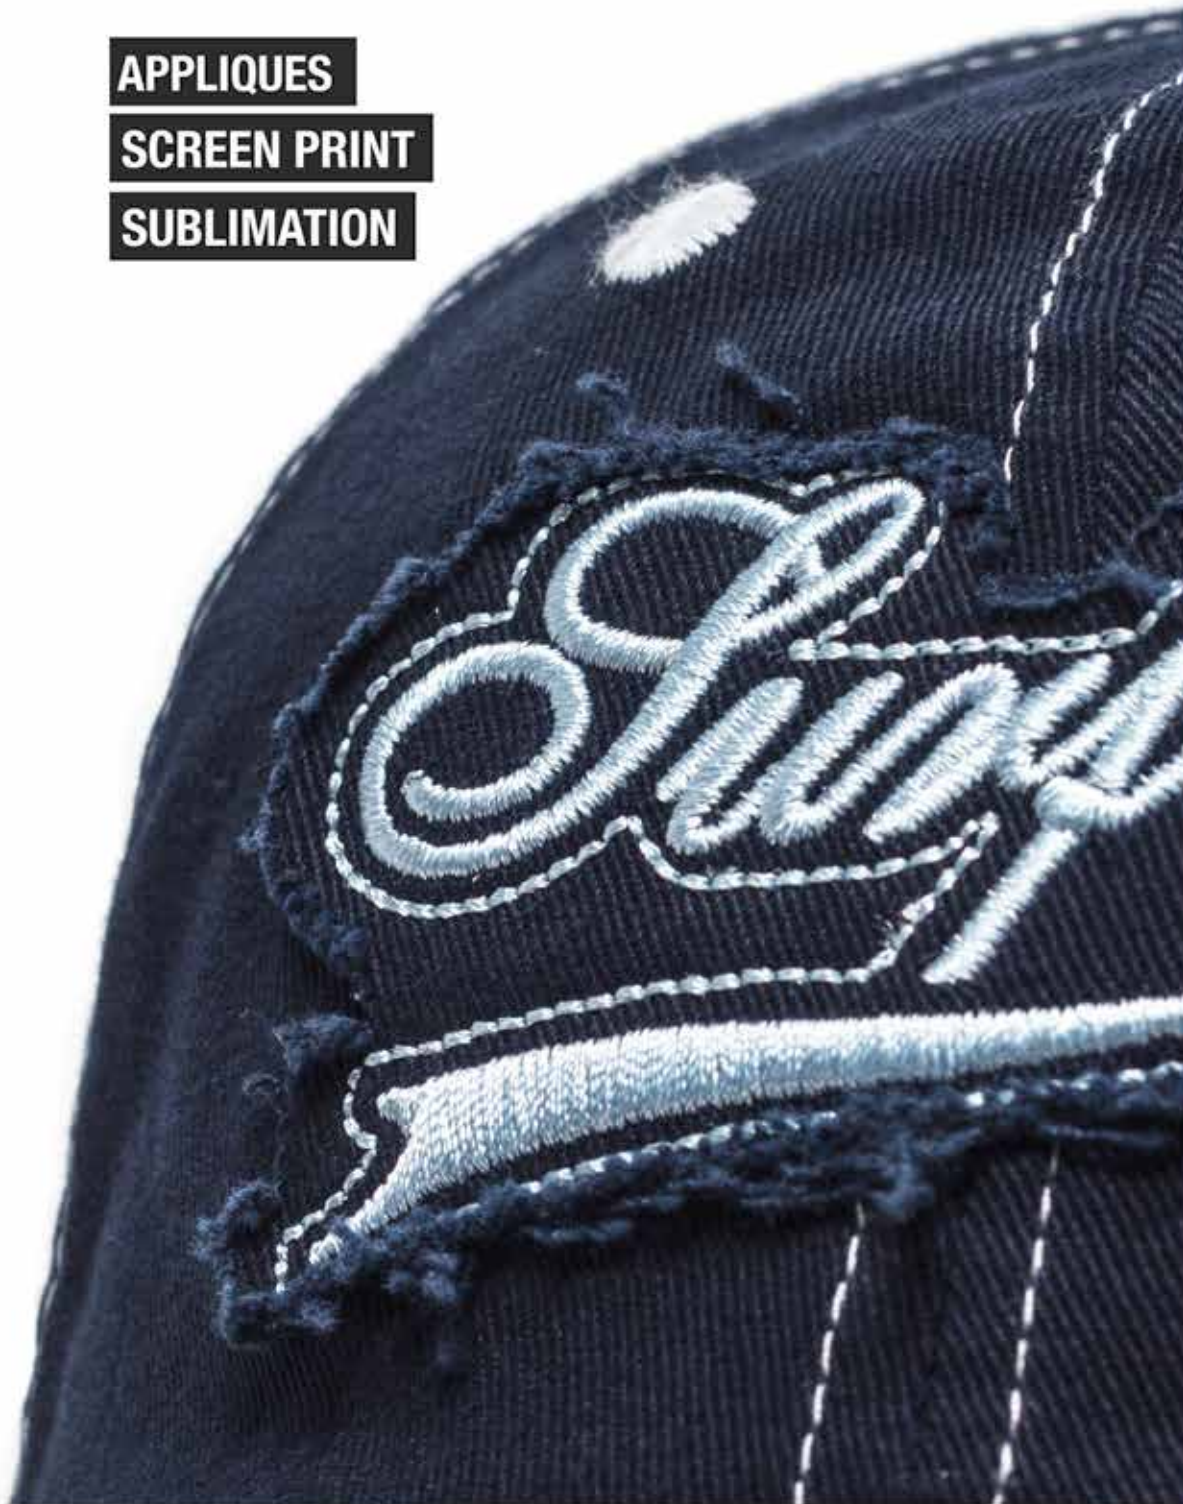

Use this type of customisation on its own or combine it with embroidery or flocking for a completely unique finish.

APPLIQUES

SCREEN PRINT

SUBLIMATION

Appliques are a more fashionable type of customisation, giving your finished product more texture and more character.

Appliques are applied to the cap with a variety of different stitching techniques. Giving your branding a badge like appearance.

Screen Print is perfect for bulk orders where the design has one or two colours, if you are looking for a cheaper alternative to printing and embroidery.

Sublimation can be a number of colours and is more expensive than screen printing. It is used on caps or bucket hats during cmt to make interesting and fun designs. You can only sublimate polyester.

CUT, MAKE & TRIM

CHROME & GOLD STICKERS

With the exchange rate being as vulnerable as it is, we have worked really hard to eliminate this factor. We have invested in a South African CMT right inside our head office in Durban.

We run lines for both caps and bucket hats. We can make a custom cap specific to your needs. Our quality is as good as any manufacturer in the world and we are very proud to say, 'Made in South Africa'.

With a production line producing 4000 units per day, we can get your order out in no time. Minimum order quantity on CMT is 150 units. Lead times are +- 20 - 25 days from approval of samples.

JACQUARD BEANIES

Jacquard Knitted Beanies - A first for South Africa!

The Jacquard knitting machine can weave any design you want straight into the knit of the beanie. This is a great alternative to using embroidery to brand your beanies!

Our production team can produce skull beanies or cuffed beanies.

No beanie is too big or small as we can manufacture from Adults to Kids.

There are multiple ways to brand on our jacquard knitted beanies. Branding options include; tags, embroidery, pu and embroidery combinations and many more.

customisation

••

- ten reasons to use promotional products

1 Eight in 10 consumers own between one and 10 promotional products.

2 53% of these people will use a promotional product at least once a week.

3 48% of consumers would like to receive promotional products more often.

4 Consumers hang on to promotional products for an average of 6.6 months.

5 63% of consumers pass along the promotional products they no longer wish to keep.

10 REASONS TO USE

PROMOTIONAL PRODUCTS

6 53% of the time, promotional products create a more favourable impression of the advertiser.

7 77% of consumers say a promotional products usefulness is the number-one reason to keep it.

8 Wearables are the top product category, followed by writing instruments, bags, calendars and drinkware.

9 Adding a promotional product to the media mix increases the effectiveness of other media by up to 44%.

10 Promotional products draw as many as 500% more referrals from satisfied customers than an appeal letter alone.

QUALITY YOU CAN TRUST

AT A PRICE YOU CAN AFFORD

We pride ourselves on quality products styled on the latest local and international trends.

We are proud of our reputation for delivering any order, large or small, within the shortest time. Our tight quality control and cutting edge technology speeds up the process and minimises errors assuring you the lowest possible prices without compromising on the quality.

Brand it your way. For all your customising needs, whether you are looking for pu prints, flocking, embroidery, dome stickers, neck labels... We can do it for you!

Work with our in-house designers, finalise the look you want, receive and approve a pre-production sample.

Simple and easy. Take advantage of our short lead times and receive a product that prides itself on stringent quality control and cutting edge technology.

Turn to page 79 to find out more about our in-house branding options
